-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Art Unit: 2635

1. This Office action is in response to the amendment filed November 24, 2003. The specification and claims 31, 34, 35, and 39, have been amended as requested. The Terminal Disclaimer has been entered.
2. The prior rejection of the claims have been withdrawn in view of the Terminal Disclaimer and the amendment.

New Rejections

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 31, 33-35, and 37-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Serbetciouglu 5,719,918.

Regarding claim 31, the claimed step of collecting data is shown in figure 3, item 316 and col. 6, lines 45-67. Serbetciouglu teaches the use of SMS in a cellular communication system to send the collected telemetry data. See Figures 3 and 7. Thus, the steps of composing the

Art Unit: 2635

message, inserting the message and transmission of the message are inherent of taught generally throughout the application. The transmission of data via SMS require the recited steps.

Regarding claim 33, the reference teaches the use of various cellular protocols such as GSM.

Regarding claim 34, Figures 3 and 4 show the step of receiving and interpreting the short message at an access point.

Regarding claim 35, this is the method equivalent of claim 31. The apparatus is shown in Figure 3.

Regarding claim 37, inherent in a telemetry system is a storing means to hold the data prior to transmission.

Regarding claim 38, see claim 33.

Regarding claim 39, this is the apparatus equivalent to claim 35. See figure 3.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 32 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Serbetciouglu.

Regarding claim 32, Serbetciouglu does not teach time stamping the collected data. It is conventional in remote meter reading system to time stamp collected data so that the transmitted data may be correlated with the time of collection for the purpose of determining demand and consumption rates. It would have been obvious to include such a step for its known purpose.

Regarding claim 36, this is the apparatus equivalent to claim 32. The teaching of the step of time stamping would require some means to perform the function.
